

PORTAPROMPT

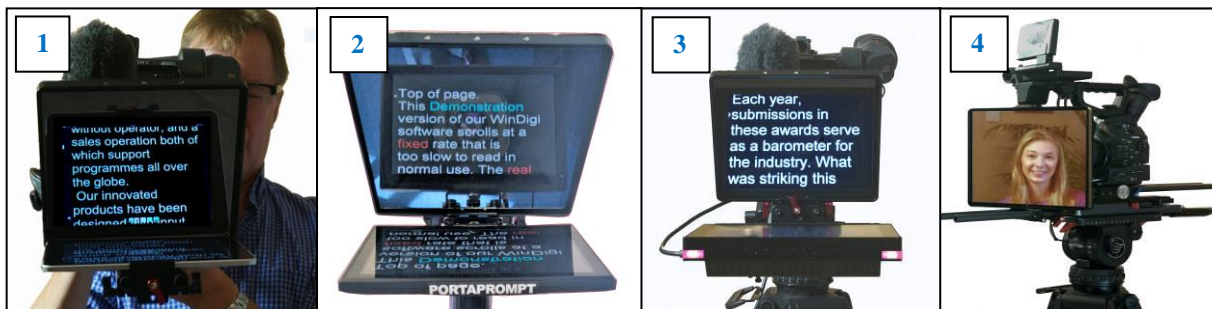

TABLET and MICRO PROMPT RIGGING SYSTEMS

365 / 465 Personal Prompting Assistant – For all types of cameras (DSLR to Systems Cameras) - a lightweight and flexible system that rigs on 15mm bars providing a prompting system for hand held shooting, conventional ENG / EFP / Studio cameras tripods, PTZ, Jimmy Jibs and Steadicam operations.

A prompting device for every day of the year!

Applications

1. 365-001 tablet and phone rigging or 365-001/13 for 13" i-Pad Pro type tablets
2. 7" / 10" Micro Prompt - 465 rig (note needs WinDigi software)
3. 12" On-camera head up display (note needs WinDigi software)
4. Passive or Active Intertron

Product Details

The system uses 15mm bars to connect a camera to the Rig which comprises of Glass Frame, T10 glass reflectors, Folding Cloth Hood (which simply laces around the lens to prevent light entering the rear of the hood) and Mounting Clamps all designed to integrate together for ease of transport.

The **365-001** (10" rig) comes with **2 x T10 glass reflectors** and the **365-001/13** (13" rig) with **2 x T13 glass reflectors** (one to go & one spare), short **carbon and alloy rigging rods, fixing screws** and a **lightweight carrying case** which can accommodate all 365 / 465 components.

The kit can be bought or rented from us!

Notes and Tips - Tablet Devices

Getting started? - Your 1st decision is to decide what type of device you will use as you need to download a prompting software application. Our rigging will fit all variants of tablets and using 15mm bars connects on pretty much any kind of camera from DSLR and PTZ cameras to conventional video and film cameras on Jimmy Jibs, Steadicams, handheld or tripod mounted rigs!

Tablet and Phone Software options

- **Portaprompt hire kit** – we use older Apple Tablets with the Pico Prompt App scrolled using the i-scroll / i-glide but this has now gone end of life and is not available for sale
- **Portaprompt sales kit** - As alternatives we would suggest Teleprompter 3 <https://apps.apple.com/us/app/teleprompter-3/id859980419> and Pro Prompter <https://www.proprompter.com/software/> both of which have been recommend to us and which we understand can be scrolled using a second device (phone) via Bluetooth

Limitations in using tablet systems? Editing scripts changes with tablets can be a pain as you have to de-rig the tablet, turn mirror mode off, make the changes, re-mirror and re-rig. Alternatively you can link with a wireless or Bluetooth key board and / or scroller which makes the operation very simple.

Using WinDigi IP Software in a tablet workflow. Create script in our WinDigi IP PC software, which has far more functionality than the tablet based software, then using a Wi-Fi network stream the IP prompt signal to an android Tablet or Prompt Monitor
